

HIGH-SPEED ETHERNET OPTICS

SEPTEMBER 2022

Source: Equinix via Data Center Frontier

Table of Contents

Abstract	4
Executive Summary.....	5
Let us enjoy the present, for a change.....	6
Back to the future: main changes in the forecast.....	7
Chapter 1: Data Center Traffic Fuels the Market.....	9
The Americas remains the largest region in interconnection bandwidth, but other regions grow at a faster pace	10
Colocation data centers are critical to helping cloud providers scale globally	11
Chapter 2: Cloud Data Centers Continue to Proliferate	14
Amazon Web Services (AWS).....	14
Meta (Facebook).....	16
Google	18
Microsoft	20
Alibaba, Baidu and Tencent.....	22
Chapter 3: Optical Switches and GPU-based AI clusters for Cloud Datacenters	24
Optical Switches in Data Centers	25
Scaling up GPU Clusters	28
H100 GPU.....	30
NVLink Switches	31
Scaling up the DGX systems into PODs and Clusters.....	32
Chapter 4: Forecast Methodology	34
Data traffic growth in mega-datacenters	34
Forecast assumptions.....	35
Forecast accuracy.....	38
Customer segmentation of the Ethernet transceiver market.....	41
Infrastructure spending is undergoing dramatic change	42
Optical components are feeling the impact of spending changes	43
Chapter 5: Market Forecast for Ethernet Transceivers	44
Sales of Ethernet transceivers exceed expectations in 2020-2021	44

Tracking Ethernet speeds	45
25G and 50G transceivers	51
40G transceivers	54
100G transceivers	55
200G Modules	58
400G Modules	60
800G optical transceivers	62
Beyond 800G	65
Co-Packaged Optics	68

Abstract

This report analyzes the impact of growing data traffic and the changing architecture of data centers on the market forecast for Ethernet optical transceivers with a focus on the high-speed modules used in data centers. It leverages extensive historical data on shipments of Ethernet modules combined with extensive market analyst research to make projections for sales of these products in 2022-2027. The report offers a comprehensive forecast for more than 50 product categories, including 1GbE, 10GbE, 25GbE, 40GbE, 50GbE, 100GbE, 200GbE, 2x200GbE, 400GbE, 800G and 1.6T transceivers, sorted by reach and form factors. It provides a summary of the technical challenges faced by high-speed transceiver suppliers, including a review of the latest products and technologies introduced by leading suppliers.

The report is based on confidential sales information and on detailed analysis of publicly available data released by leading component and equipment manufacturers along with considerable input from industry experts.

LightCounting Market Research

www.lightcounting.com

LightCounting is a market research company focused on the in-depth study of high-speed interconnects for the datacom, telecom, and consumer communications markets. Our research covers the whole supply chain from optical and semiconductor components, to modules, sub-systems, and their applications in telecom and datacom systems.

Our industry reputation was built by providing solid market data and objective analysis to help industry executives in making tactical and strategic business decisions and to see past all the market hype, rumors, press reports, blogs and other distortions that so often complicate and confuse many decision-making processes.

This LightCounting market report contains material that is a confidential, privileged, company product for the sole use of the intended recipients being LightCounting clients and subscribers. Any review, reliance on or redistribution by others or forwarding without LightCounting's expressed permission is strictly prohibited.
