

CHINA WIRELESS INFRASTRUCTURE FY21 – APRIL 2022

Despite COVID-19 and unabated geopolitical headwinds, China is pursuing its economic ascension and 5G aspiration

Table of Contents

ABSTRACT	3
KEY TAKEAWAYS	4
DESPITE COVID-19 AND UNABATED GEOPOLITICAL HEADWINDS, CHINA IS PURSUING ITS ECONOMIC ASCENSION AND 5G ASPIRATION.....	6
2022 HAS STARTED WITH SIGNIFICANT HEADWINDS THAT ARE SLOWING CHINA'S ECONOMY	6
HOWEVER, SLOWER ECONOMIC GROWTH MAY NOT PREVENT CHINA FROM BECOMING THE WORLD'S LARGEST ECONOMY BY THE END OF THIS DECADE	6
THAT CHINA WAS ON TRACK TO TAKE OVER THE U.S. AS THE WORLD'S LARGEST ECONOMIC POWER WAS PREDICTED 10 YEARS AGO	7
COVID-19 WAS THE FINAL TOUCH	8
<i>COVID-19 has reset the GDP race between the U.S. and China.....</i>	8
<i>However, China's aging population may get in the way of China's economy overtaking that of the U.S.</i>	9
<i>Chinese government economists are worried.....</i>	10
<i>...and see 5G as a key enabler of China's digital economy.....</i>	10
<i>China's 5G-based digital economy is rapidly taking off and paving the way for 6G.....</i>	10
FROM ECONOMIC POWER TO 5G SUPERPOWER.....	11
BY FAR, CHINA BOASTS THE WORLD'S LARGEST BTS FOOTPRINT	12
...AND THE WORLD'S LARGEST MOBILE TOTAL AND 5G SUBSCRIBER BASE	12
2022 WILL SEE THE SAME LEVEL OF 5G UNIT ACTIVITY AS LAST YEAR.....	13
<i>Despite a slight increase in 5G BTS, 5G capex will decline this year.....</i>	14
<i>The slight 5G spending decline and the 4G drop will drag the whole RAN market down 5% over 2021</i>	15
IN 2026, WE EXPECT CHINA TO KICK OFF 6G ROLLOUTS	15
THE COMBINED DOMESTIC MARKET SHARE OF HUAWEI AND ZTE ROSE TO 89% FROM 80% IN 2021.....	16
<i>We rightly anticipated that Huawei and ZTE would continue to dominate the market at the expense of Ericsson and Nokia.....</i>	17
ONCE AGAIN, CHINA DELIVERED, UNDER EXTREME PRESSURE.....	18
BOTTOM LINE: CHINA IS BECOMING ISOLATED AND SELF-RELIANT, AND DIVIDES THE WORLD INTO 2 SPHERES OF INFLUENCE	18
<i>Geopolitics altering the 5G race prompted many companies to shift manufacturing away from China.....</i>	18
<i>Re-shoring chip manufacturing takes time and is not cheap</i>	18
<i>And if cut from U.S. technology, China's home-grown chip makers won't be able to expand</i>	19
<i>So many things can go wrong in this West vs. East game</i>	19

Abstract

This report focuses on 5G developments in China, including macroeconomics, geopolitics, and technology. The publication date is scheduled a few weeks after the 4 service providers (China Broadcasting Network, China Mobile, China Telecom, China Unicom) provide their annual reports so that we can gather many details about 2H21 and provide a 2022 outlook and a 5-year forecast. This report also includes RAN vendor market shares and analysis.
